

We are pleased to be able to offer you a wide selection of products to shield your systems against electromagnetic fields and EMI/RFI.

NM Sonic products can provide the ultimate protection and help your sound system deliver the best possible sound!

Our Products clear the sound, open-up the soundstage making it more 3d holographic, presenting the instruments and the human voice more realistically in dimensions and tonality and make the system completely silent, more pleasant and coherent, more musical and emotional.

Music comes more live, unstressed, uncompressed with improved, bass control, dynamics, rhythm, tonal balance and accuracy. The sound, in every single system on which the NM SONIC PURIFIERS were tested, changed immediately, it acquires better "silence" and it becomes more relaxing.

Everyone that has listened to this product and has lived with it has agreed that the system acquires greater immediacy, and is more natural, less compressed, better homogeneity and consistency.

- The SOUNDSTAGE acquires a larger density and the presence of instruments and artists become more realistic.
- The image becomes more holographic and the 3 dimensions become more explicit.
- The system acquires higher interest as you become more in tune with the instrument and voices heard.
- As for the frequency levels, the low level becomes more rhythmical and acquires better "body" and control.
- The mids acquires better acoustic purity, and again sounds more natural, relaxing and realistic than before.
- The highs regain 'extension' and better homogeneity. They become more relaxing and natural without losing precision and analysis. There is no more piercing of the ear effect in this area as well.
- The fine and elegance of the notes make their presence more perceptible and make the listener not to think if the system plays or not, or if the highs or lows are proper. The listener slips into the music without thinking, hypnotized by the musicians workand this is what we are all after in reality. **A live performance.**

What unites NM SONIC with you, is our united love for music and audio in general, and this opens new paths and horizons for everyone to connect worldwide with.

The range of "NM SONIC PURIFIERS" products.

Our products come in **4 versions** depending on the use:
Cable standard, Standard, Reference & Signature.

• **Cable Standard**

Dimensions : *W 14cm x D 1,5cm x H 1,8cm*

For all AC cables close to the IEC plug of the equipment. It is attached with tie wraps to any analog interconnect at the entry of the signal, to digital interconnect, video cables, speaker cables, power strip AC cable.

• **Standard**

•
Dimensions : *W 7,5cm x D 2,5cm x H 1,6cm*

for POWER DISTRIBUTION BOARDS. You very simply put this on your Electrical board and keep it there.

Reference

Dimensions : W 8,5cm x D 7,5cm x H 1,4cm

This should be placed on the cover of external phono stage's, preamplifier's, power amplifier's, cd's, cd transports/dac's, and any external power supply. It can also be placed near the motors of any turntable. We can also place this on top of video projectors to increase picture quality, contrast and 3D imagery.

•

Signature

Dimensions : Diameter 10cm x H 3cm

This should be placed on the cover of external phono stage's, preamplifier's, power amplifier's, cd's, cd transports/dacs, and any external power supply. It can also be placed near the motors of any turntable. We can also place this on top of video projectors to increase picture quality, contrast and 3D imagery.

Designed especially for High End products having high current / power supplies and high electromagnetic fields.
